1. This office acknowledges receipt of the following items from the Applicant:  
  
Papers submitted under 35 U.S.C. 119(a)-(d) have been placed of record in the file.
2. Claims 1-18 are presented for examination.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1, 9-12 and 14-18 are rejected under 35 U.S.C. 102(a) as being anticipated by Applicant Admitted Prior Art (AAPA).

Figure 3 of AAPA is directed to a nonvolatile memory comprising: a plurality of memory cells, each of the memory cells having a first and a second source/drain areas, a control gate, and an insulating trap layer disposed between the control gate and a channel area lying between the first and the second source/drain areas, wherein the trap layer includes a use bit area in proximity to the first source/drain area, for storing data depending on the presence or absence of electric charge to be trapped, and a non-use bit area in proximity to the second source/drain area, in which the electric charge is trapped while data is held in the use bit area (page 4, lines 20-25). Also see page 4, lines 4-7 and page 5, lines 23-24.

5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. Hamilton et al. (U.S. Patent No. 6493261) and Bautista (U.S. Patent No. 6331951) disclose a single bit array edges.

**Allowable Subject matter**

Art Unit: 2818

6. Claims 2-8 and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter:

Claims 2-8 and 13 include allowable subject matter since the prior art made of record and considered pertinent to the applicant's disclosure, taken individually or in combination, does not teach or suggest the claimed invention having wherein at the time when an erasing operation mode for bringing the use bit area into an erased state is completed, or before a writing operation to the use bit area, the non-use bit area is put in the electric charge trapped state.

8. When responding to the office action, Applicants are advised to provide the examiner with the line numbers and page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

9. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02 (b)).

10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hoai V. Ho whose telephone number is (571) 272-1777. The examiner can normally be reached on 7:00 AM -- 5:30 PM from Monday through Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on (571) 272-1787. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
